

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I understand that you are considering a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

It really doesn't seem fair that low-volume and primarily residential customers would bear the same universal service fund burden as high-volume residential or business customers.

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. This is to request that you reject the proposal to move the USF collection system to a flat fee.

Sincerely,

Carol Hubbard
